
FACULTY DEVELOPMENT

Educators and Teaching Staff

Prepare your faculty for the twenty-first century classroom with **high-energy faculty development workshops**. Any session can be delivered **in-person or online as a webinar, for one hour or up to three hours, and topics can be tailored** to meet your specific needs.

Why BMcTALKS?

BMcTALKS workshops differ from the typical professional development sessions because participants do not just sit and listen to a good talk.

They talk. They write. They stand. They shout. Oh ... and they learn! They are constantly engaged and moved to examine what the content means for them.

Sessions are based in andragogy (adult learning theory), and participants practice techniques, positioning them to take what they learn to immediately impact personal and team performance.

Book Your Session!

Teach Like a Superhero ... No Cape Required

It's no secret that trying to connect with and reach today's students can be a challenge of seemingly epic proportions.

New educators will get the perfect foundation for starting out in the right direction to be world-class teachers, and experienced educators will walk away refreshed and renewed.

You will know how to use learning outcomes to energize students throughout any class and how to deliver course content in an engaging way that retains students and prepares them for success on your campus and in the demanding world of work.

Never Let Them See You Sweat: How to Keep Your Cool When Challenging Students Run You Hot

You plan an amazing class session and design the perfect homework assignment. Then it happens. Just like that—either the Latecomer, the Know-it-All, the Sidebar Conversationalist, or the Constant Facebooker makes an appearance.

Find out why these and other challenging student types behave as they do and precisely what to do that will result in keeping learning on track and keeping your cool no matter what student shows up to class.

Tech-Knowledge-y: Smart Ideas to Use E-learning Tools to Engage Students

Big edtech leaps have you providing students with e-learning content that's exciting!

However, simultaneously, some faculty have concerns about what to do when students report to campus. They may think "Everything's online! what do I do NOW?!"

In this interactive session, faculty receive practical techniques that position them to be facilitators who use techknowledge-y to intelligently transform face-to-face class sessions into the most meaningful and engaging sessions ever.
